Wedding RSVP checklist

In the Pretty Girly Designs collection, All-in-One and QR Code are names for the same invitation format. Use this checklist on your personalized proof.

Set the guest link

Before personalizing the code.

GUEST DESTINATION

Copy the RSVP link you plan to send guests and enter it in the invitation's QR field.

Open the link in a private browser window. Check that it shows your names and event and that a guest can reach the reply form.

Write the reply line

Put the deadline and a readable alternative beside the code.

SAMPLE INVITATION WORDING

Please reply by 15 April. Scan the code or visit [short guest web address].

For a phone alternative, try "Please reply by 15 April. Scan to RSVP or call [host] at [number with country code]."

Test both routes

Use a proof at the intended print size.

GUEST-VIEW TEST

Scan the printed proof with a second phone. Then type the printed address yourself or call the printed number.

If guests need a passcode or an invitation name, try that step. Send one test reply using a test guest and confirm that it reaches the host.

Before you place the order

Read the reply date aloud and confirm the month is clear. Replace every sample contact detail. Keep the guest page available through your deadline and remove the test reply from your guest count.

DESIGNS & EXAMPLES
